Q14 - What, if anything, did you find most valuable about this course?	
Response Rate:	46.15% (12 of 26)
1	learned a lot of knowledge about analysis data
2	it was cool
3	The uploaded course materials
4	The notes were very valuable
5	The notes were good
6	The handouts are easily understood and clear
7	The assignments were valuable.
8	Professor Millard is always willing to schedule office hours for more help and explain the material in different ways to make the material easier to understand and comprehend. I also think the examples towards the end helped with the intuition of the content.
9	Notes that are provided on Brightspace.
10	Improved my studying habits
11	I thought that the notes that the professor posted to our Brightspace was most helpful.
12	I think get some home work is good

Q15 - In what ways, if any, could the course be improved?	
Response Rate:	50.00% (13 of 26)
1	add some slides to the work
2	Write less on the blackboard and upload handouts in advance
3	Upload more lecture slides and practice exam
4	To use slides for all his classes because sometimes I can't read the handwriting and i am more focused on trying to copy everything down for both his classes than listening to what he's talking about it
5	The professor can write the notes more clearly and show more process of practices during class
6	The notes can be clearer, and they include some topics that aren't covered in class, so they can be confusing to reference if you aren't following along with the material. Also, some proofs can be overwhelming that aren't tested, I feel there was some extra material there that added some confusion.
7	The course can be improved if the students had access to previous exams.
8	Show the ppt I think is more good
9	More homework's and how to do them effectively More examples that relate to tests
10	Maybe do review for the tests
11	Less review of easy stuff in the beginning and more focus on the difficult stuff. As well as maybe some real examples like in the homeworks
12	I, personally, find myself being a visual learner. In addition, independent, out of class studying suites me the best as well. However, the teacher did not have any slides. Thus, I found myself having to search up a lot of YouTube videos to supplement the course.
13	Can add more examples on class time
